

HOW TO DOWNLOAD CODEMARK CERTIFICATES FROM THE JAS-ANZ REGISTER

INTRODUCTION

The [JAS-ANZ register](#) is a comprehensive list of JAS-ANZ accredited certification and inspection bodies and their certified clients. It sits on the [JAS-ANZ website](#) and is the best way to verify claims of JAS-ANZ accreditation. For CodeMark certified organisations only you are now able to access certificates from the register. The following aims to guide you through the steps on how to search for and download a CodeMark certificate. For more detailed instructions on how to use the register, please refer to *Instructions for use of the JAS-ANZ Register*.

HOW TO FIND THE REGISTER

The JAS-ANZ register sits on the JAS-ANZ website homepage under 'Our Directory' (fig. 1). It comprises of three parts: the accredited bodies search, the certified organisations search, and the certified personnel search. To search for organisations certified by CodeMark you need to select the certified organisation search.

Figure 1. How to find the JAS-ANZ register.

CERTIFIED ORGANISATIONS SEARCH

Once you have selected the 'certified organisations search' you will be presented with a range of different search criteria (fig. 2). To help you find what you are looking for we will now guide you through how to use each of the search fields. The first of these being the organisation criteria. If known you may type the name of the manufacturer in the 'organisation name' field (fig. 2).

CertMark International Pty Ltd	Creepy Crawly Pest Control Pty Ltd	Toowoomba	Australia	Active

Figure 2. Searching for a manufacturer or organisation.

The 'country' and 'suburb/city' fields are best used to narrow down results. Please be aware though that while the country field is a simple drop-down box with selection criteria the suburb/city field is type text and depends on how the accredited body has input the information. For instance, using 'CSR' as an example Figure 3 shows a total number of 28 results. We can narrow this down in figure 4, by selecting 'Australia' in the country field and typing 'Sydney' in the suburb/city field, to just 5 results. If we type 'North Ryde' (a suburb of Sydney) in the suburb/city field however, we are presented with a further 11 results in the area (fig. 5).

In some cases, it is best to use the 'certification type' criteria to find information on organisations certified to a particular standard or for a particular product. If you know what version of the standard you are looking for, simply type this in the field 'Standard of certification' (fig. 6). For CodeMark certified organisations you will either have two options either 'BCA – all clauses' or 'Building Code of Australia (BCA) 2016/Amdt 1', please be aware that certificates are only available to download for the latter at this point in time.

Figure 6. CodeMark certified organisations search.

You can narrow this down even further by typing a product type or name in the 'certification' field (fig. 7).

The screenshot shows a search form with three main sections: Organisation, Certification type, and Certified by who. The Organisation section has fields for Organisation name, Country (with a dropdown), and Suburb / City. The Certification type section has a Standard of certification dropdown (set to 'Building Code of Australia (BCA) 2016/Amdt 1'), a note about ISO standards, and a Certification text field containing 'steel'. The Certified by who section has an Accredited Body dropdown (set to 'Choose an option') and a Type of certification dropdown (set to 'Choose some o'). A blue Search button is at the bottom left.

Figure 7. How to use the Certified Organisations Search.

The last of the search criteria options are the 'who' fields. If you are looking for an organisation certified by a particular accredited body you may select the body from the 'accredited body' field (fig 8.). To narrow this down to only the product certification results, select 'product certification' in the 'type of certification' field.

The screenshot shows the same search form as Figure 7, but with different selections. In the Certified by who section, the Accredited Body dropdown is set to 'Global-Mark Pty Ltd' and the Type of certification dropdown is set to 'Product Certification'. The Certification type section's Standard of certification dropdown is set to 'Choose some o' and the Certification text field is empty. The Organisation section fields are also empty. A blue Search button is at the bottom left.

Figure 8. Certified by who criteria search.

DOWNLOAD A CERTIFICATE

Once you have a list of results, to navigate to the certificate simply click on the 'Organisation Name'. You will see a summary of the certification details (fig. 9). Select the 'Download Certificate' button and you should see something similar to figure 10. If the certificate doesn't appear, you may need to install an Adobe Reader program or update or existing software. If you are still having trouble accessing the certificate, please contact JAS-ANZ immediately at contact@jas-anz.org.

CERTIFIED ORGANISATIONS

Building Solutions Pty Ltd

Type of Certification	Product Certification
Status	Active
